However, there is no point to waste valuable resources - the first couple of upgrades to the amount of heroes available per week should suffice, but you should increase their overall amount (your roster size) to 25 as quickly as possible. The first two upgrades are quite cheap, and they will give you a 20% discount on all those purchases. Never, ever send a party without taking food, especially on longer missions. Especially in the first missions.5. Take care of the party's stress level. 2. You can lock up to 3 positive quirks on a single character - remember that you can't remove them in any way. The Blacksmith can be omitted during the first several weeks, as you won't be able to upgrade the weapons and armors of your heroes above level 1 until they reach level 2. Stress is the most dangerous mechanic in the game, which must always be monitored. First things first, you should upgrade your Stage Coach, so that you have access to at least 13-16 heroes at all Times. A single, unfavorable move during combat and stepping into a trap can easily break the 100 points barrier, resulting in a hero getting an affliction. 3. Support is the only one who is less specific as he generally supports the team through his buffs, changing the hostile party's order and so on. It's never worth the risk, especially when using high-levelled characters. 14. 10. They will be unavailable for the next mission, but it is a far better solution than letting them go on a quest whilst insane. Every time that a hunger check appears on the screen and you won't have any food for your team, you will have to make them starve, which will result in them taking 20% max health damage and about 20 points of stress. The very first building you should focus on should be the Stage Coach. well, dealing the damage and killing the enemies as fast as it is possible. It's a good idea to equip an item (trinket) increases the chances of Scouting. You don't want to end up with a warrior who has a peculiarity that lowers life by 20 %. You can save a lot of time with this method. Most of them will die sooner or later; take care of your best warriors, and for risky missions use the craziest and weakest. The battles against bosses are always located in the deepest parts of the dungeons. If you don't know which heroes (and in which combinations) are suitable for a specific type of mission, check the sections "Locations" and "Recommended Teams." Always count the number of rooms and if you want to go straight to the boss, see to the right where the quantity of rooms is larger. The amount of gold you will have at the beginning of the game is extremely limited, so don't spend it on everything that appears. The tank protects the team and takes the most damage on itself. Your heroes are going to die, you'll have to deal with it. Always try to have at least one hero with a high chance of disarming a trap (the chance to disarm a trap can be checked in the "Hero Classes" section of this guide). 3.12. Also, it's worth paying attention to the skills they start with - every skill they start with (which is the one you want to use) is a 1,000 gold that you don't have to spend, which is a lot at the beginning of the game. Except for the beginning, do not recruit all available heroes. Basically, it means that every 5th update is now free. These roles are: tank, damage dealer, healer and support. Health Bar Prev Bosses Garden Guardian A little stress can be healed with the help of critical hits, but it's always worth having a character able to reduce the stress of his teammates. If your hero happens to have a very powerful positive quirk (details can be found in the "Details" section), it may be worth blocking him. atla atla ainnau amu e jsoitnop 02 ^Ata(i^Areh od essertse on onemua ednary mu moc adasnepmocerA erpmes ^A ahlidamra amu me *Acov ,ossi a sa^AarG letnerf A raigiv ed redop o erongi ofAN .12 .ogoj on soiruC ed sopit so erbos siam rebas arap "oiruC" ofAs^Aes a etlusnoc - aicn^Adecetna moc sol-jA^cifirev erpmes eved *Acov euq ossi rop ^A e .)cte .essertse arap 001+ .a^Aneod amu(lam etnemamertxe rabaca edop sodaugeda sneti mes soiruC sod snugla ravita .oruo otium razimonoce ed zapac ;Ares *Acov missa - raqul ues arap ortuo ramot e i^Areh essed rarvil es ocif^Aneb siam erpmes ^A ,essertse ed edaditnaue emrone amu uo a^Aneod amu ,savitagen sedadiralucep ed emrone edaditnaue amu moc ofAssim ad ratlov levAn oxiab ed i^Areh mu eS .jatsitlucO ,latseV(^Acov moc oriednaruc mu evel erpmes ,sevarg sotnemiref rorfos mes sogimini so sodot ed arromsam a rapmil ed zapac ;Ares euq ed azetrec met ofAn *Acov eS .siacolL e "sepAsivorP" sepA^Aes san ossi erbos rednerpa edop *Acov - ofAssim ad ofAs^Aarud ad edneped edaditnaue aus .ofAssim ad sotnemirpus soa otnauq .sedadilbah saus ed s^Avarta sfubed so arit e aviv atsef a m^Atnam rodaruC O .m^Abmat essertse ed onad oa otnauq ,ed^Aas ed ,raluger onad oa otnat es-acilpa - agimini ofAs^Aisop *A4 e *A3 ad mev onad ed edaditnaue roiam A .9 .22 .lepap adac arap seled rap mu sanepa rehlocse etnet e si^Areh so sodot lev- An ed abus ofAN .51 .muiratnaS on "erovrjA" ariecret an sedargpu soriemirp 2 so sonem olep e .otnemartar arap tols odnuges o eieugolbsed *Acov euq arap ,aidaba an e anrevaT an "erovrjA" adac ed sedargpu soriemirp 3 so ratelpmoc anep a elaV .siam adnia atnemua euq otnemapmaca ed edadilbah amu met e ,rarolpxe ed ecnahr roiam met i^Areh etse - reggid evarG o ^A aferat asse arap atiefrep essalc a ,ossid m^Ala .6 .71 .ossucus od edateme ofAs sadaugeda sepA^AaraperP .adimoc me razimonoce anep a elav ofAN etnemlaer .racsirra ACNUN e ol-jA^vita ridiced ed setna oiruC o euqifirev erpmes .sedadiralucep e sotir^Am sues arap ehlo ,adifuges me ,e raqul oriemirp me asicerp *Acov si^Areh ed sessalle siauq euqifireV ,evary ftubed mu / e ,opmet od ognol oa onad ,onad ed zapac the potential enemy groups (preventing them from surprising your party, and increasing the chances of your party surprising them). Darkest Dungeon is a challenging Gothic Horror Dungeon Crawling RPG about the stresses of dungeon crawling, developed by Red Hook Studios.
